Product Details :

The Canon IXUS 155 20MP point and shoot camera is selling now in stunning black. If you have wanted to buy a high quality digital camera but one that is not too expensive, then you will surely want to get your hands on this awesome device.

At a weight of a measly 130 grams, the camera is super thin. The Canon IXUS 155 is as compact as they come, and also extremely stylish. At 20 mp, the camera has a CCD sensor. This sensor is used along with the upgraded DIGIC 4 + imaging processor. This mechanism improves the image quality by up to 60 percent if you're shooting at a high ISO speed. The processor also speeds up other features. It improves the digital IS system, while also speeding up the starting up of the device and AF feature.

An optical zoom of 10X and a digital zoom of 20X. If you are taking group shots with a large number of people, you can even use the 20X zoom without any loss of quality of the image. The 2.7 inch LCD display is ideal for the purpose of subject tracking. The IXUS 155 also has a maximum focal length of 140mm and a minimum focal length of 24mm.

In the Eco Mode, the LCD screen of the camera darkens when it is laying idle or not being used. It has reduced the signals usually read on the screen to a fraction of what they originally are. This means the camera will consume a lot less power than usual.
