File formats supported	JPEG

Connectivity

USB Cable	✓
------------------	---

Battery

Type of Battery	Li Ion
Numbers of Shots	250
Number of Batteries	1

Dimensions

Dimensions (W x D x H)	95.1 x 24.3 x 56.7 mm
Weight	149 grams

After Sales Service

Warranty Period	2 Years
-----------------	---------

Product Description :

The A3200 IS is a small and stylish compact which fits easily into your pocket. The 2.7 inch LCD on the rear is clear in all conditions, the menus are easy to navigate and the buttons are well laid out as well as being easy to press.

On the top of the camera there are the typical buttons you will find on a compact camera including the on/off switch, zoom rocker and shutter release. As well as these there is a mode dial, similar to what you would see on a DSLR. This makes it really easy to switch between the various modes on the camera, such as Program, Live, Auto, Easy, Scene, Filters, Discrete and Movie. There is also a dedicated button for Face Detection on the rear.

According to CIPA / Canon testing the battery life is rated at 250 shots. This is slightly more than what is expected from the battery when used in the A3300 IS. During testing the battery was more than capable of a couple of days shooting without charging.

Canon claim the camera is capable of 0.8fps in continuous shooting mode. During testing, in P mode the camera shot at 0.7fps and in low light mode it is capable of 2.7fps
